

**Workshop on
“Natural Gas Processing and Natural Gas/ LPG Pipeline Transportation”
(June 29 - July 01, 2009)**

Feedback from the participants:

- The participants expressed that the duration of the workshop should be 5 days with three sessions per day.
- A visit should be arranged to a gas processing plant.
- Topic on Energy Audit & Instrumentation to be included.
- Documentary film on gas processing plant or a CD of the same be made available to participating institutions.
- R&D issues/ problems to be referred to the institutes for finding solutions.
- Industry should come forward for upgrading the curriculum in the engineering institutes including providing textbooks.
- Participants were of the view that additional subjects needs to be included in the workshop for upgrading the knowledge of the faculty for which they will provide their inputs in next 10 days.
- Overall programme effectiveness - 81%
