

**Seminar on
"Simulation and Modeling in Process Industry"
(Refineries & Petrochemicals Focus)
(June 9-13, 2009)**

Feedback from the participants:

- The participants expressed their dissatisfaction regarding failure of the local area network connectivity at IIT Campus from June 10, 2009 (second day) to June 12, 2009 (last day at IIT) which greatly hampered the hands on practice which the program had aimed to deliver.
- Shorter theory lectures.
- The programme may include less topics and cover each elaborately.
- The programme duration could be longer, proposing 15 days.
- The hard copy of the presentations should have been given prior to the presentation to understand the topic better.
- The quality of slides included in the topic of 'Phase Equilibria in Refinery Processes' be made better and readable.
- Very satisfied with the three presentations given at Panipat Refinery and the visit of the refinery was well appreciated by each participant.
- Overall programme effectiveness - 80% (Average of 21 feedback forms received)
